CLAIMS

- 1. An application process of a polymeric carrier consisting of at least one thermoplastic polymer based on polyester or copolyester to sublimatic transfer printed paper.
- 2. The process according to claim 1, characterized in that the application of the polymeric carrier to the transfer printed paper is effected by means of melting, coupling, coating or sintering.
- 3. The process according to claim 2, characterized in that the application by melting is offected by means of bubble extrusion plants, in a fact area or in a calender.
- 4. The process according to claim 2, characterized in that the application by coupling is effected by the coupling of a previously formed polymeric film.
 - 5. The process according to claim 2, characterized in that the application by coating is effected by means of a rotogravure, roll revers, etc. of solutions of the polymeric carrier.
 - 6. The process according to claim 2, characterized in that the application by sintering is effected by the sintering of powders.
- The process according to any of the previous claims,
 characterized in that the polymeric carrier consists of
